Issue Date: January 8, 2008	)	Attorney Docket No. 007147.00065

For: MULTI-LAYER THERMOPLASTIC FILMS AND PACKAGES MADE THEREFROM

**REQUEST FOR CERTIFICATE OF CORRECTION**

U.S. Patent and Trademark Office  
Customer Service Window  
Randolph Building, Mail Stop: Certificate of Correction Branch  
401 Dulany Street  
Alexandria, VA 22314

Sir:

Pursuant to 35 U.S.C. § 254 and 37 C.F.R. § 1.323, this is a request for the issuance of a Certificate of Correction in the above-identified patent. A copy of PTO Form 1050 is appended. The complete Certificate of Correction involves one page.

The mistakes identified in the appended Form occurred through no fault of the Patent and Trademark Office, as disclosed by the records of the application, which matured into this patent. Also enclosed are the relevant portions of the Recordation Form Cover Sheet, the Assignment, the Information Disclosure Citation dated January 25, 2001. These errors occurred in good faith without deceptive intent.

Issuance of the Certificate of Correction containing the corrections is earnestly requested. Please charge the requisite fee of \$100.00, and any additional fee, which may be associated to our Deposit Account No. 19-0733.

Respectfully submitted,

BANNER & WITCOFF, LTD.

Dated: June 10, 2009

UNITED STATES PATENT AND TRADEMARK OFFICE  
**CERTIFICATE OF CORRECTION**

PATENT NO.: 7,316,833  
DATED: January 8, 2008  
INVENTOR(S): Deane E. Galloway *et al.*

It is certified that errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

On the cover page, under the Assignee section (73):  
Please replace "Penchiney" with --Pechiney--.

In the References Cited section (56) under U.S. Patent Documents (Page 2, Line 18):  
Please replace "Hodson" with --Hodgson--.

In the References Cited section (56) under U.S. Patent Documents (Page 2, Line 31):  
Please replace "Hodson" with --Hodgson--.

In the References Cited section (56) under Other Publications (Page 3, column 1, line 24):  
Please replace "*Exxon Cities Breakthrough*" with --*Exxon Cites Breakthrough*--.

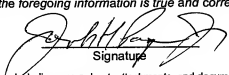

In the References Cited section (56) under Other Publications (Page 3, column 2, line 3):  
Please replace "Standord University, Standord, CA" with --Stanford University, Stanford, CA--.

### ASSIGNMENT OF PATENTS AND PATENT APPLICATIONS

In consideration of One Dollar and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Pechiney Plastic Packaging, Inc., a corporation organized and existing under the laws of the State of Delaware, with a principal place of business at 8770 Bryn Mawr Avenue, Chicago, Illinois 60631 (hereinafter called "Assignor"), has assigned and hereby assigns, effective *nunc pro tunc* July 23, 1999, to Pechiney Emballage Flexible Europe, a corporation organized and existing under the laws of France, with a principal place of business at 1 rue de l'Union, TSA 11003, 92843 Rueil Malmaison, France, its successors, assigns and legal representatives (hereinafter called "Assignee") Assignor's entire right, title and interest in the patent applications and patents listed on the attached Schedule A and in any and all United States Patents which may be obtained on any of said applications, and in any continuation, divisional, reissue or reexamination of any of the foregoing. The foregoing assignment includes the right to sue infringers for past infringement of any of the foregoing patent rights.

Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks to issue any applicable Letters Patent to Assignee.

For said consideration, Assignor agrees to perform, upon request, any affirmative acts necessary to vest the above-granted rights in Assignee and its assignees, whereby said patent applications and patents will be held and enjoyed by Assignee and its assignees, to the full end of the term for which said patents may be granted as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment had not been made.

And for said consideration, Assignor hereby assigns to Assignee Assignor's entire right, title and interest in said patent applications and patents for all foreign countries, including all priority rights under the International Convention, and agrees to execute, at the request of Assignee or its assignees, all documents in connection with any application for foreign letters patent therefor.

Date JANUARY 17, 2002

The invention provides laminar polyolefin film materials having a base film layer comprising a blend of an olefin polymer and up to about 30% by weight of at least one very low density copolymer of ethylene and a C<sub>3</sub> to C<sub>20</sub> alpha olefin comonomer copolymerizable with ethylene, said base layer having a heat sealable film layer present on one or both surfaces thereof comprising a very low density copolymer of ethylene and a copolymerizable C<sub>3</sub> to C<sub>12</sub> alpha olefin comonomer. The ethylene copolymer constituents of the film are characterized as having a density in the range of about 0.88 g/cm<sup>3</sup> to about 0.915 g/cm<sup>3</sup>, a melt index in the range of about 0.5 dg/min to about 7.5 dg/min, a molecular weight distribution ( $M_w/M_n$ ) of about 1.5 to about 3.5 and an essentially single melting point in the range of about 60° C. to about 115° C., measured as a DSC peak T<sub>m</sub>.

Films of this invention exhibit extremely good hot tack seal strength at temperatures in the range of from about 200° to 290° F. thereby rendering them extremely useful as packaging materials in high speed packaging operations.

## ABSTRACT

The present invention provides for a polymer composition comprising a blend of from about 25 to about 90% by weight of a very low density ethylene polymer having a density on the range of from about 0.88 to 0.925 g/cm<sup>3</sup>, a melt index of from about 0.5 to about 7.5 dg/min, a molecular weight distribution not greater than about 3.5 and a compositional distribution breadth index greater than about 70%, and from about 10 to about 75% by weight of a low to medium density ethylene polymer having a density of from about 0.910 to about 0.935, a melt index of from about 0.5 to about 20, a molecular weight distribution greater than about 3.5 and a compositional breadth index less than about 70%.

The invention also provides for films prepared from this blend having single layer construction or having laminar ABA construction wherein the A or skin layers comprise the blend of this invention and the B or core layer comprises a different olefin polymer such as high density polyethylene.

Films of this invention exhibit excellent elongation, tensile and impact properties and also softness, feel and noise properties which render them eminently suitable for use as back sheet components in the fabrication of absorbent articles such as diapers, bed pads and like articles where such properties are desirable.
